

Volume 16.

Callies Win The Five Roses Cup

By Defeating Redcliff in Final Game Last Tuesday

The Medicine Hat callies put the hammerlock on the Five Rivers cup by defeating Redcliff here last Tuesday by three goals to none.

Despite the fact that the Redcliff team was considerably handicapped by the loss of three of the regular players whose places were filled by three young players who never played a match before, the game was most exciting and entertaining for the first period. In this half the play was so close that neither side scored.

In the second period the visitors

appeared to realize they had to get busy if they were to take home the cup, and as Pickering was forced to retire from the game shortly after the play commenced the league was

Further handicapped. Shortly after play resumed they scored their first goal which was closely followed by the second. The third goal was notched just a few minutes before time was called.

The result of this game means that the Callies have won both the league and the Five Roses cups.

There is still the McClellan cup to be played for this season. These will be knock-out games but the draw for

Getting Ready For The Bennett Shield

Independents to Play Tonight and Next Saturday

The Independent football team is now getting ready for the Bennett Shield play-off in which they will take part in the near future.

For the purpose of giving the team a work-out and enabling the committee to pick the best possible team for these games, two practice games have been arranged. The first of these will take place in the Hat tonight, and the second on Saturday evening.

The following are the teams picked:

(A) Team
McBain
G. Davis Givin
Robinson Patterson McDonald

Carpenter	Thompson	Phillips
	(B) Team	
	Hall	
Fenton	Harvey	
McCulley	Lakey	Reynolds
A. Dutton		Fairless
L. Davis	Muskell	Clark
Reserves—K. Appleton, H. Galdie.		
G. Goldie, Davidson, Butterworth and Wade.		

These players are requested to be on the field ready to play at 6:30 p.

(A) team will wear the Callie

ers and players will strip in their usual dressing quarters irrespective of what team they are on.

Should any of the players be unable to take part in either of both games they are requested to notify Sam Goldie, phone 2956 without delay.

These should be good games for the fans as all players will be anxious to show their stuff in an effort to catch a place on the Bennett Shield line-up.

HORSES FOR THE SOVIET GOVT. ARE SHIPPED EAST

Completing the first boatload, a train left Alberta during the past week for Quebec carrying 380 head of horses purchased in the soviet

Socialist Republics. Included in this cargo from Quebec will also be 591 head of recently shorn and bred

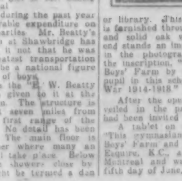

The total number of horses purchased by the Russian government in Alberta during the past month up to 267. It is expected that buying for further shipments will again commence at points in the south and southeast of the province on August 28th.

— — —

Papers and organizations of various kinds throughout the province, are putting up a strong demand for a better and more extended system of road making.

The Prince of Wales, Prince George and Premier Baldwin passed through town early yesterday morning on the way West. The two princes will spend five days holidaying at the M. P. ranch, while Mr. Baldwin will go on to Banff before returning east.

The Canadian People

In treating on the celebration of the Diamond Jubilee of Confederation, the Dominion Parliament at its next session might well take one more step in further promoting a united Canadian sentiment and develop a stronger Canadian national spirit by making legislative provision for the recognition of the Canadian race, and to ensure that a person born in Canada, wherever their racial descent, shall be designated in the census returns of this Dominion as a "Canadian."

At the present time, tens of thousands of native-born Canadians are denied the right of suffrage, not only in their own eyes but before the world, through their inability to present themselves as Canadians. Under the census regulations of the past they have been forced to designate themselves as English, Irish, Scotch, French, Dutch, German, American, or anything but what they really are. Canadians.

As a result, the census statistics of this Dominion advertise to the world that this country of Canada is inhabited by all manner of races and conditions of people except Canadian. That, in all this broad Dominion, a self-designing nation to the British Commonwealth of Nations, with a status equal to that of Great Britain, Italy, and a full-fledged member of the League of Nations, there is no such person as a Canadian.

If in England the same intelligent and sensible system of census enumeration prevailed, many families who have lived in England for centuries would be compelled to classify themselves as Dutch, or French, or anything but English. His Grace the Duke of Devon, who is a member of the House of Lords, and other members of the Royal Family would be recorded as Germans. In the United States, if our absurd system existed, there would be every known race under the sun, except Americans. It is the innumerable existence of the Census authorities in this matter, which is one of the causes of people in other lands falling to understand and appreciate the national and international position of Canada today.

Furthermore, the census statistics are most unfair to the people of Canada. There are thousands of Canadian whose parents, grandparents, great-grandparents, were born in Canada, and who do not know, and much less care, whether their ancestors came from the British Isles or from the Canadian prairie. They are not Canadians. That is good enough for them, and it ought to be good enough for the Canadian Government.

In some cases a man's great-grandfather may have been Scotch and his great-grandmother French; their son may have married a German; the granddaughter of this latter union may have married a Ukrainian born in Canada but one of whose parents was a Hungarian, who in turn had Russian blood. What is the nationality of such a Canadian-born man? He himself does not know, and it is doubtful if the average census enumerator can figure it out. The only point on which the enumerator is clear, and because the Government is in haste to make it absolutely clear, is that the man is not a Canadian regardless of the number of times generations of varying racial descent who were born in Canada.

"Canada our Country" should be the motto of the Diamond Jubilee celebration. "Our people Canadians" should be the record declared by the census returns, not a conglomerate mixture of peoples. Under the existing system of enumeration it is not at all surprising that so many false statements are being made to the effect that Canada is rapidly becoming a non-English country, and that the foreign-born predominates. If the children of three and four generations of native-born Canadians must still be classified as Russian, or German, or American, anything and everything but Canadian, it is small wonder that people who do not understand our absurdly absurd system are misled and arrive at conclusions the very reverse of truth.

Canada's Diamond Jubilee year is a most important time for Parliament to right this injustice to so many of its citizens and to the Dominion as a whole.

To Cross Ocean in Small Boat

Great Yacht Twelve Feet Long Will Be Used By Daring Navigator

In a tiny, submarine-like steel vessel of 12 feet length, a daring navigator has begun the trip across the Atlantic. The little boat, which is only 12 feet long, with a beam of 2 feet, will be propelled by a gasoline with a petrol mechanism which will propel the boat.

A "submarine" vessel in the shaft will release him when the wind is fair. Two persons can be accommodated, although there won't be full length sleeping quarters and no electric water-light equipments and no water-light equipments and no water-light equipments.

"FACE LOOKED TERRIBLE"

Pimples Were Awfully Painful, Cuticura Heals.

"A small pimple appeared on my nose and I scratched it. It grew larger and larger. The pimples were so bad and so many that I was unable to go to work. They itched and were so painful. I tried many things but nothing helped. I was discouraged when I read in the paper that Cuticura cured pimples. I bought a box and used it as directed. In a few days the pimples were all gone. My face looked so much better. I am so glad. I will tell everyone I know about Cuticura."

For every kind of the face and body, Cuticura Soap, Ointment and Lotion are excellent.

Write for free booklet, "How to Use Cuticura," to J. C. Benson, Ltd., 111, St. John Street, London, E.C. 4, England.

New Device Will Permit Planes to Land on Roofs of Buildings

Airplanes, now, can be safely brought to a stop within a distance twice their own length under a revolving propeller, arrangement, recently patented by a Frenchman, is being tested by the French Air Force.

The propeller cannot be operated until the plane lands. Just as it is placed, and when thrown in reverse turns the airplane with the ease of a feather.

The inventor believes his device will permit air fields for mail and commerce to be established on the roofs of buildings, eliminating the slower and costly handling of mail, express and passengers from suburban fields.

Sour Stomach Risings Subdued by "Nervine"

A Few Drops Bring Relief

The wonderful relief you get from twenty drops of Nervine will surprise you. It is a powerful stomachic, water, and almost immediately you feel better. Nervine brings up the gas caused by fermenting food, and relieves that distressed feeling in the stomach. When you take it, it strikes you at night, Nervine is a sure relief for gas and indigestion. For nervous on hand, always keep Nervine for emergency use. 25c. per bottle.

Big Demand For Farm Boys

Waiting List of Six Hundred Farmers Reported at Guelph

Six hundred farmers are on the waiting list for farm boys. The demand for farm boys is so large that no party which has arrived this far in the world has been able to supply the demand for farm boys for longer than 48 hours. Applications have been received from all over the world for farm boys. The demand for farm boys is so large that no party which has arrived this far in the world has been able to supply the demand for farm boys for longer than 48 hours.

DEBILITY DUE TO INDIGESTION

Perfect Digestion Comes Through Rich, Red Blood

There can be no perfect digestion unless you have rich, red blood. This is scientifically true. It is also true that there is no such thing as the stomach that is not a weak for every other reason. It is the blood that is the key to the stomach. The blood is the key to the stomach. The blood is the key to the stomach.

The many so-called stomach remedies merely try to digest your food for you. They do not touch the stomach. They do not touch the stomach. They do not touch the stomach. They do not touch the stomach.

Two men, who were weak and whose blood was not the help of Mr. Williams' Pink Pills. He has estimated that the trip will occupy a day, and he is determined to find some one to share the hazards with him.

Double Wedding in Airplane

Machine, Carried Witness, Clergyman, and Invited Guest

For the first time in the history of aviation a double marriage ceremony was conducted at Berlin, Germany, high in the air, directly over two churches. The two were exchanged before a regular altar erected in the plane, while a photographer reproduced organ music.

A half-hour before the plane, one of the largest air vessels of the Luftwaffe, had been transformed into a house of flowers with the beautifully decorated altar in the center.

The new wedding couple resided to the Tumpelhof Air Port, where they received the congratulations of numerous friends, and partook of a breakfast before starting on their respective homelands.

British Expedition To B.C.

Will Collect Rare Flower Seeds in Mount Garibaldi District

The Royal Horticultural Society of Great Britain, with its history of over one hundred years of good work, has decided to finance an expedition to the Mount Garibaldi district of British Columbia for the purpose of collecting seeds from the numerous rare and beautiful flowers which grow in the higher slopes of this great range.

J. C. Benson, Ltd., 111, St. John Street, London, E.C. 4, England.

When a man has real trouble he keeps them to himself.

Display of Mirth Leads to Trouble in German Town

At Seattle, in German of laughter is liable to lead to trouble.

A German couple, Herr and Frau, stepped out of a shop while the latter told her husband a funny story. The husband burst into a hearty guffaw, whereupon a policeman rushed to the scene, charged the husband with disturbing the peace, and fined him a dollar, on the spot.

This affront so amused Herr and Frau that they again burst out laughing. Before the final chuckle had ended he was being led away to the police court. A witness testified that he had not laughed but had "bleated like a sheep."

This remark so tickled the laughing husband that he could not keep serious to longer and enjoyed an hour of merriment. He was charged with \$2.50. Still with a smile on his face, Stander handed the clerk \$10.00 and left the scene with \$7.50 on his coat.

Wheat Pool Agency For South America

Western Canadian Wheat Pools Will Establish Selling Agency in the Argentine

W. J. Johnston has been appointed resident representative in the Argentine for the selling agency of the three Western Canadian wheat pools. He will leave for his new field of work early in September and will have his headquarters in Buenos Aires.

The appointment is the outcome of a meeting trip that Mr. Johnston made to Buenos Aires last year for the purpose of inspecting the wheat conditions of the wheat trade in that country. It has since been decided that the wheat pool to be permanently represented there and while the pool will be of a somewhat experimental nature, it is believed that it will give it a thorough trial, in expectation of the two countries coming into more direct relations as both producers and exporters of wheat.

Airships Terminal Planned

\$350,000 To Be Spent On Equipment in South Africa

Plans concerning the projected flying machine and ground equipment for an airship terminal in the Union of South Africa are almost completed. It is agreed that the terminal will be controlled by the Union's railway administration and most of the equipment, \$250,000 will be spent on the main line. It is understood this will be located near Cape Town.

Miller's Worm Powders are safe and palatable to children, who show no hesitancy in taking them. They will certainly bring worms trouble to the children. They are safe and palatable to children, who show no hesitancy in taking them.

Sorting Mail In Air

British Air Mail is Making Test of Special Plans

An airplane specially designed for the rapid transport of mails is being tested by the Air Ministry. It will carry, besides the pilot and an engine, a postal car, which will continue his work while flying at 100 miles an hour.

The latest type of mail airplane is fitted with parachute, and instead of the usual tail it has a storable parachute, which, when needed, breaks to help pull the machine up quickly on alighting at mail aerodromes. A central engine room contains two 24-horsepower engines, each of 100 h.p.

Gum-Dipping

A Firestone Contribution to Economical Travel

The Gum-Dipping process is one of Firestone's contributions to economical travel. It insulates and impregnates the tires with a special rubber, reducing internal friction and at the same time binding the cords together by a stronger union of rubber, thus giving greater strength and flexibility to the tire.

Firestone chemists and engineers know that if they could find a way to eliminate this destructive heat and internal friction, the mileage-giving qualities of tires would be greatly increased. Such a method was found and called "Gum-Dipping."

The Gum-Dipping process is one of Firestone's contributions to economical travel. It insulates and impregnates the tires with a special rubber, reducing internal friction and at the same time binding the cords together by a stronger union of rubber, thus giving greater strength and flexibility to the tire.

THE HIGH SCHOOL

THE communication in last week's issue of the Review, in which the writer outlined some suggestions in connection with the high school here, has caused some comment, but most of it appears to be against the suggestions proffered.

Parents of children in the high school apparently prefer having their children go to school in their own home town just as long as possible, as they feel their influences and home supervision is preferable at that tender age, to some of the other advantages to which reference was made by our correspondent.

Exception is also taken to the figures submitted by our correspondent, wherein it is stated that approximately \$2000 a year could be saved by discontinuing the high school here, and suggesting that this amount could be used for tuition fee and transportation for grades ten and eleven to Medicine Hat. Our correspondent has extremely overlooked the fact that with the discontinuance of high school our government high school grant of approximately \$600 a year would also be discontinued. This would make a big hole in the \$2000 which our correspondent figured would go towards extra salary, tuition and transportation.

Some parents heard discussing the proposition said that if it became necessary for them to send their children out of town for grade ten and eleven work they would move the whole family to the Hat and the father would drive up here to his work instead of having the children drive down there to school. That would be a serious blow to the town as it would mean a big reduction in rent, gas, grocery and water bills.

Bad roads during the winter which might make it impossible for vans to get through and cause loss of time at school, were also referred to.

Those who have lived in other parts of their west do not agree with our correspondent that the work is too heavy in the high school for one man. They claim similar work is being done in other places with a fair degree of success and point out that no principal yet has complained of the work, and that other hand has claimed it was "easy picking" for him, when accepting the position.

Most parents who have children now in high school as well as those who expect to have some there in the near future are of the opinion that it would be unwise to do any experimenting along the line suggested as it might be very difficult to get a high school again, if the experiment proved a failure. The fact that Redcliff has had both public and high school accommodations in the past has been the means of attracting people from the surrounding country to come here and live. This has meant vacant houses occupied, more water and gas users and more customers for our merchants. In a word the school has been one of the town's greatest assets. To make any change in our school at the present time when conditions in town are more favorable than they have been for many years,

would be a serious mistake. For this reason few appear to be willing to take the chance.

Just as we were beginning to think the radio was a wonderful invention some one comes along and tells us that Adam made a loudspeaker out of his spare parts.

Judging from the enthusiastic receptions the Prince of Wales is receiving in all parts of Canada on his present visit, Canada is saying to him, "The more we see of you the better we like you."

The opening of a new export business for Canada is announced in the East by a successful experimental shipment of cream from Montreal to London, Eng. This is nothing new as the old country always been getting the cream of our products.

The C.P.R. is taking the precaution to have fire-guards ploughed along their right-of-way. Farmers should follow the same example as soon as possible. As there is grave danger of prairie fires this year owing to the rank growth on the prairie.

A great revival in interest in Canada by British industrialists is announced and it is said many large firms in the old country are seriously considering locating branch factories in this country. What's the matter with making an effort in trying to get some of them to locate in this great natural gas belt. Cheap power is an important factor in securing industries.

Motor drivers are complaining about the habit some children in the south end of town have formed of placing tack-points end up—across the street. Several punctures and much inconvenience have already been reported. This is a very mean kind of sport for youngsters to indulge in. Their parents should have a little talk with them. If that does not stop them just let us know and we'll suggest another remedy.

The trouble now going on in the United States over Vanzetti and Sacco, the two men sentenced to the electric chair for a murder they were found guilty of having committed seven years ago, appears to be but a result of the system of conducting trials in that country, the system of electing officials, and the growing habit of outside interference with the courts of the state.

Mr. Hon. Stanley Baldwin is making a profound impression on the people of Canada during his present visit to this country. Although called upon several times a day to address audiences he always has something intensely interesting to say and on every occasion he shows he is well posted, not only on Imperial matters but also on past and present conditions in Canada. Mr. Baldwin's present visit to Canada will long be remembered.

The new system adopted by the department of education for training teachers, is being very favorably commented upon. By the system normal school pu-

bls will be required to visit rural schools for observation in the conduct of same. They will also be required to take charge of these schools for a short period and teach lessons, etc., under the supervision of experienced teachers or inspectors. It is hoped by this system to better prepare young teachers for their work when receiving diplomas. This is a good idea and should help to bring about the desired result.

"The monthly Bulletin issued by the Royal Bank of Canada in just to hand. It contains a review of the financial situation throughout Latin America. It is interesting to note that a large part of Latin America is now on a gold basis, or with money so thoroughly stabilized that there is no doubt that stability may be maintained.

There is also a description of the new government publication, "Monthly Review of Business Statistics," with a comparative discussion of the electric statistics put out by the Government and those put out by the Royal Bank of Canada. The bulletin draws attention to the big improvement in business in Canada for the first five months of this year and is quite optimistic for even greater improvements in the future. It is a most encouraging review and forecast.

Medicine Hat schools made a brilliant record in the grade VII examinations. There was one hundred per cent pass in all the schools in the city in this grade.

Trail-Riders to Hold Fourth Annual Pow-Wow

Being through the water at the muddy side of a lake is a well called for the horses. 2. Mount Assinibois, the shoulder of the trail. 3. Some of a trail and Pow-wow in Lake Valley. 4. Mount Assinibois, the shoulder of the trail.

"TRAIL RIDERS." The very sound of the words brings the tang of woodland fire smoke, the crackling of burning twigs, the musical running and tumbling of streams slipping hurriedly down the mountain side to offer an early morning drink to thirsty campers. It is there again in the world sufficiently prosaic not to be attracted by the fascination of that word "trail!" It organizes mysticism, an elusive something lying always round the best kind of the road, beyond the next mountain peak.
One part of Canada in particular is threaded with the world's most fascinating trails, to be followed through the world's most lovely scenery, day after day, each in its ultimate termination. That is the arena indigenous to Banff and Lake Louise, in the heart of the Canadian Rockies—a veritable land of desire for the man or woman with the love of Nature and the explorer's hot blood in their veins, where every trail leads to beauty, peace and radiant health.
Off the beaten track of the luxury loving rocking chair tourist, directly south of Banff is Mount Assinibois, the objective of this year's trail ride. This majestic mountain towers many thousands of feet above the snow-fields, and is clearly reflected in the surface of the lakes that lie at its base. No white man reached the base of this noble pyramid until 1926, when E. L. Barrett, an American mountaineer,
